

IN THE CLAIMS

Please amend the claims as follows:

Claim 1 (Original): A silica glass crucible used for pulling silicon single crystal, wherein at least an outer surface of a wall part of the crucible is covered with fine grooves having a length of less than  $200\mu\text{m}$ , a width of less than  $30\mu\text{m}$  and a depth of from more than  $3\mu\text{m}$  to less than  $30\mu\text{m}$ .

Claim 2 (Original): The silica glass crucible according to Claim 1, wherein the fine grooves exist on more than 10 % of the outer surface of the crucible.

Claim 3 (Previously Presented): The silica glass crucible according to Claim 1, wherein a sliding frictional coefficient of the outer surface of the crucible to a carbon member at 1500 degree C is more than 0.6.

Claim 4 (Original): The silica glass crucible according to Claim 1, wherein the outer surface of the crucible is covered with the fine grooves by carrying out a sand-blast treatment and a hydrofluoric acid etching on the outer surface.

Claim 5 (Original): The silica glass crucible according to Claim 1, wherein the number of projections having a height of 0.1 mm or more is an average of less than  $5 / \text{mm}^2$  per unit area on the outer surface of the crucible.

Claim 6 (Previously Presented): A silica glass crucible used for pulling silicon single crystal, wherein at least an outer surface of a wall part of the crucible is covered with fine

grooves having a length of less than  $200\mu\text{m}$ , a width of less than  $30\mu\text{m}$  and a depth of from more than  $3\mu\text{m}$  to less than  $30\mu\text{m}$ , and

the fine grooves exist on more than 10 % of the outer surface of the crucible, and  
a sliding frictional coefficient of the outer surface of the crucible to a carbon member at 1500 degree C is more than 0.6.

Claim 7 (Previously Presented): A silica glass crucible used for pulling silicon single crystal, wherein at least an outer surface of a wall part of the crucible is covered with fine grooves having a length of less than  $200\mu\text{m}$ , a width of less than  $30\mu\text{m}$  and a depth of from more than  $3\mu\text{m}$  to less than  $30\mu\text{m}$ , and

the fine grooves exist on more than 10 % of the outer surface of the crucible, and  
a sliding frictional coefficient of the outer surface of the crucible to a carbon member at 1500 degree C is more than 0.6, and

the number of projections having a height of 0.1 mm or more is an average of less than  $5 / \text{mm}^2$  per unit area on the outer surface of the crucible.

Claim 8 (Withdrawn): A process for forming fine grooves on the surface of a wall part of silica glass crucible used for pulling silicon single crystal, comprising carrying out a sand-blast treatment and a hydrofluoric acid etching on the said surface.

Claim 9 (Withdrawn): A process for forming fine grooves according to Claim 8, wherein fine grooves have a length of less than  $200\mu\text{m}$ , a width of less than  $30\mu\text{m}$  and a depth of from more than  $3\mu\text{m}$  to less than  $30\mu\text{m}$ .

Claim 10 (Withdrawn): A process for forming fine grooves according to Claim 8, wherein the sand-blast treatment is the polishing method by spraying the hard particles having the higher hardness than that of the silica glass, with high pressure gas.

Claim 11 (Withdrawn): A process for forming fine grooves according to Claim 10, wherein the hard particles are the crystalline quartz particles.

Claim 12 (Previously Presented): The silica glass crucible according to Claim 1, wherein the fine grooves have a depth of from more than  $3\mu\text{m}$  to  $10\mu\text{m}$ .

Claim 13 (Previously Presented): The silica glass crucible according to Claim 1, wherein the fine grooves have a length of 10 to  $100\mu\text{m}$ .

Claim 14 (Previously Presented): The silica glass crucible according to Claim 1, wherein the fine grooves have a length of 10 to  $100\mu\text{m}$  and a width of 10 to  $30\mu\text{m}$ .

Claim 15 (Previously Presented): The silica glass crucible according to Claim 6, wherein the fine grooves have a depth of from more than  $3\mu\text{m}$  to  $10\mu\text{m}$ .

Claim 16 (Previously Presented): The silica glass crucible according to Claim 6, wherein the fine grooves have a length of 10 to  $100\mu\text{m}$ .

Claim 17 (Previously Presented): The silica glass crucible according to Claim 6, wherein the fine grooves have a length of 10 to  $100\mu\text{m}$  and a width of 10 to  $30\mu\text{m}$ .

Claim 18 (Previously Presented): The silica glass crucible according to Claim 7, wherein the fine grooves have a depth of from more than  $3\mu\text{m}$  to  $10\mu\text{m}$ .

Claim 19 (Previously Presented): The silica glass crucible according to Claim 7, wherein the fine grooves have a length of 10 to  $100\mu\text{m}$ .

Claim 20 (Previously Presented): The silica glass crucible according to Claim 7, wherein the fine grooves have a length of 10 to  $100\mu\text{m}$  and a width of 10 to  $30\mu\text{m}$ .

Claim 21 (New): The silica glass crucible according to Claim 1, further comprising a carbon susceptor adhered to the outer surface of the silica glass crucible.

Claim 22 (New): The silica glass crucible according to Claim 6, further comprising a carbon susceptor adhered to the outer surface of the silica glass crucible.

Claim 23 (New): The silica glass crucible according to Claim 7, further comprising a carbon susceptor adhered to the outer surface of the silica glass crucible.

Claim 24 (New): The silica glass crucible according to Claim 3, wherein the carbon member is a graphite susceptor.

Claim 25 (New): The silica glass crucible according to Claim 6, wherein the carbon member is a graphite susceptor.

Application No. 10/801,683  
Reply to Office Action of December 8, 2006.

Claim 26 (New): The silica glass crucible according to Claim 7, wherein the carbon member is a graphite susceptor.

DISCUSSION OF THE AMENDMENT

Claims 1-26 are active in the present application. Claims 21-26 are new claims. Support for new Claims 21-23 is found in paragraphs [0006] and [0007]. Support for new Claims 24-26 is found in paragraph [0007].

No new matter is added.
